Forecast Demand
& Optimize Production
## in your factory

SmartFactory

Smart Factory is a cloud-based platform that boosts the productivity of any factory by using Artificial Intelligence.

The platform predicts the expected demand and intelligently distribute orders across multiple production lines or suppliers, ensuring SLA achievement and stock levels.

By providing valuable insights to support the decision-making process, Smart Factory is the perfect ally for any planning manager.

QUICK SETUP WITHOUT SOFTWARE REQUIREMENTS

SmartFactory

Increase business profitability and SLAs

Accurate Demand Forecast

Optimize the production plan & resources
